

Centurion 5.10c, 6p

June 04, 2013

Conny Amelunxen, Jamie Chong

Rack: 60m rope, 12 quickdraws, 4 long draws

Approach the Outpost: Follow the Conroy Forest Service Road north past the Forgotten Wall and the Crest on foot, 4x4 or high clearance 2-wheel drive. The second left turn, about 2.4 km past the Forgotten Wall, leads immediately to a parking area and the trail. *On foot, it is about 35 minutes to the trail head from Cheak parking.* Follow the trail, trending north, through forest and boulder field for 15-20 min to the base of the route. Centurion is on the prow of largest and northern most wall.

Descent: Rappel the route with a single 60m rope.

Note: The area is often windy so the rock dries quickly. The wind is great in mid-summer, but can be cold in the off season.
